

Nautilus Environmental Job Opening

Posted: February 2015

Position: Bioassay Laboratory Supervisor

Nautilus Environmental is currently seeking a full-time Laboratory Supervisor to join our San Diego team of aquatic toxicologists. Nautilus is a consulting laboratory focused on the analysis, integration, interpretation, validation and application of high quality toxicity data. The primary responsibilities for this position include day-to-day coordination of bench-level laboratory activities related to aquatic toxicity testing on water, sediment, and other matrices as well as the direct management of laboratory technician staff.

The applicant should have previous experience working in and managing the operations of an aquatic toxicity laboratory. At minimum, a Bachelor's degree in Marine or Aquatic Biology, Environmental Studies, Environmental Toxicology or related field is required. A strong working knowledge of chemistry and statistics is also desirable. On the job training will be provided; however, successful applicants are well-versed in various aspects of the industry, including commonly used testing protocols (e.g., EPA, ASTM, etc.), regulatory programs (e.g. NPDES, dredged materials, etc.), and technical aspects (e.g. TIEs, WERs, etc.) of aquatic toxicology.

Key personal qualifications for this position include effective interpersonal and communication skills, reliability, attention to detail, and flexibility in schedule. The successful applicant must also be able to work within a team setting, motivate others, multi-task, meet project deadlines, and ensure efficient completion of high-quality work. A positive attitude is an absolute necessity. This is a non-exempt, benefit-eligible position that requires some overtime, weekend work, and holiday scheduling. Pay is commensurate with experience.
